

The *second* Master of Computing and innovation Group Project weekly meeting will be held in **Room 464 at 3.00pm on Tuesday 13 Mar 2018.**

# Meeting minutes on 13th Mar

**Attendance: Zheng Xu, Junjie Guo**

## 1 Apologies

None

## 2 Questions to ask

### 2.1 About the capturing data

1. Question1: Should we collect the packets by Wireshark or utilize the website's testing database?

Answer: It is not necessary to collect packets from any applications. All the training data and testing data could be downloaded from KDD cup competition's database. It includes different sizes of training data, testing data and detailed descriptions of all parameters.

2. Question 2: (relative)How to design this system?(Data Acquisition Module-storage-analysis Module)

Answer: The core part of the project is designing the analytic system, so we just need to implement the analytic module first. If we could complete the analytic system and have extra time, we will implement the other non-functional requirements.

### 2.2 About the relevant technology

1. Question 1: HBase data storage technology and Mapreduce parallel technology?

Answer: Base on the Hadoop platform.

### 2.3 About the following steps

1. Question 1: How to define the first milestone works?

Answer: Reading some relevant papers to collect information and acquire basic technologies knowledge.

Note: Next meeting to be held on 20 March 2018.
